It's late summer 1793, and the streets of Philadelphia are abuzz with mosquitoes and rumors of fever. Down near the docks, many have taken ill, and the fatalities are mounting. Now they include Polly, the serving girl at the Cook Coffeehouse. But fourteen-year-old Mattie Cook doesn't get a moment to mourn the passing of her childhood playmate. New customers have overrun her family's coffee shop, located far from the mosquito-infested river, and Mattie's concerns of fever are all but overshadowed by dreams of growing her family's small business into a thriving enterprise. But when the fever begins to strike closer to home, Mattie's struggle to build a new life must give way to a new fight—the fight to stay alive.

Fish in a Tree

From #1 New York Times bestselling author Meg Cabot, the dark reimagining of the Persephone myth begun in ABANDON continues into the Underworld. Seventeen-year-old Pierce Oliviera isn't dead. Not this time. But she is being held against her will in the dim, twilight world between heaven and hell, where the spirits of the deceased wait before embarking upon their final journey. Her captor, John Hayden, claims it's for her own safety. Because not all the departed are dear. Some are so unhappy with where they ended up after leaving the Underworld, they've come back as Furies, intent on vengeance . . . on the one who sent them there and on the one whom he loves. But while Pierce might be safe from the Furies in the Underworld, far worse dangers could be lurking for her there . . . and they might have more to do with its ruler than with his enemies. And unless Pierce is careful, this time there'll be no escape.

Every era has its merger; every era has its story. For the New Media age it was an even bigger disaster: the AOL-Time Warner deal. At the time AOL and Time Warner were considered a matchless combination of old media content and new media distribution. But very soon after the deal was announced things started to go bad—and then from bad to worse. Less than four years after the deal was announced, every significant figure in the deal -save the politically astute Richard Parsons—has left the company, along with scores of others. Nearly a \$100 billion was written off and a stock that once traded at \$100 now trades near \$10. What happened? Where did it all go wrong? In this deeply sourced and deftly written book, Nina Munk gives us a window into the minds of two of the oddest men to ever run billion-dollar empires. Steve Case, the boy wonder who built AOL one free floppy disk at a time, was searching for a way out of the New Economy. Meanwhile Jerry Levin, who'd made his reputation as a visionary when he put HBO on satellite distribution, was searching for a monumental deal. These two men, more interested in their place in history than their personal fortunes, each thought they were out-smarting the other.
