Resources in Education

Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. While they always hoped to go somewhere fun like Disney World or Universal Studios, they usually went somewhere weird and cheap that their father, former boy bander Don Masters, found in an ad in a truck stop coupon magazine. But this year was different. Where they went couldn't be found on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where they met world famous action movie star Jordie Paine -- star of such films as I Plan to Kill You Now and the sequel, I Plan to Kill You Now, Too, the

ninja film, Chuck Butcher: Sword Wielding Jackal, as well as the light-hearted romp, Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or crimpetitors, compete for their freedom. In this scifi comedy, the stakes are very simple -- if they win, they rule, if they lose, they must suffer the consequences.

The Fear Place

In this book, Sue Popkin tells the story of how an ambitious—and risky—social experiment affected the lives of the people it was ultimately intended to benefit: the residents who had suffered through the worst days of crime, decay, and rampant mismanagement of the Chicago Housing Authority (CHA), and now had to face losing the only home many of them had known. The stories Popkin tells in this book offer important lessons not only for Chicago, but for the many other American cities still grappling with the legacy of racial segregation and failed federal housing policies, making this book a vital resource for city planners and managers, urban development professionals, and anti-poverty activists.

Welcome to the nightmarish future of The Theta Timeline, where '1984' meets 'Slaughterhouse-Five.'

Leaders who rely on war and fear. The men and women who refuse to accept a tyrannical government. And an unreliable means of time travel in which most people don't survive. Freedom was not stolen overnight, but gradually chipped away through a campaign of war and terror. People were told new laws and restrictions were for their own good. But the reality was a monstrous regime bent on controlling its subjects. Now, there is only one way to stop the Tyranny: go back in time and prevent it from ever starting. At times eloquent, funny, satirical, and infuriating, *The Theta Timeline* is not only Dietzel's most powerful book, it is as important as any dystopian vision created to date.

The year is 2084, and the U.S. has so thoroughly embraced big government that the Wapols (Washington politicians) and their army of pubrats (public bureaucrats) monitor your diet, your finances, even your sex life. But what happens when an omnipresent government becomes impotent? In the spirit of Orwell's *1984* and *Animal Farm*, and Rand's *Atlas Shrugged*, but written with the style and wit of Kurt Vonnegut, *Eidam* offers a humorous and thought-provoking cautionary tale against trading away our freedoms to a tech-empowered nanny-state, and asks if it's possible for mankind to become so dependent,

we lose the ability to live free. When a virus threatens to wipe out all of mankind, President Poll and his D.C. cronies escape to a survival shelter leaving the rest of the world to perish. However, while the Wapols are safely locked away in their bubble, a reclusive tech genius does what all the experts said was impossible: he develops a treatment that will save mankind from extinction. Only, he won't release it unconditionally; he wants to make sure mankind is worth saving first. Opting to remain anonymous, the man enlists Clyde Sexler, a sixteen-year-old social reject, to issue his demands, and Clyde finds himself playing a starring role in mankind's salvation. But, after first enjoying his newfound power and fame, Clyde starts to worry about how far the recluse is willing to go to reboot civilization. With the Wapols busy fighting for control of their bubble, President Poll taking advice from his talking toilet, and the rest of Washington concerned only with optics and clinging to power, Clyde might be mankind's last hope. Can he save us from certain death or worse?

Babies are so easy to love. It feels so natural to love a newborn child unconditionally. The love just naturally flows out of us. Nobody has to teach us. Nobody has to ask us. Nobody has to convince us. It just happens. How wonderful it would be if we could always love, cherish, and appreciate our children as gorgeous, loving, angels. How great it would be to carry our love with us and maintain it powerfully forever. We can do that. We simply need to be nudged to remember. We just need to be reminded what we hold dear and precious. We only need to take time out for a few moments and bask in the memory (and the present moment reality) of what is so amazingly and divinely wonderful about our gifts from the divine. This book is one of those reminders. Read this to your children so they (and you) remember how much you love them.

Then find out that our terrible student scores relative to the developed world might not be worth all the anguish. The USA will prevail because of our superiority in. Could the solution for world peace or curing cancer be streaming in from space? The Search for Extraterrestrial Intelligence could someday soon detect what would be the most monumental discovery since the invention of God. How can religion overcome the immorality of purporting to promise an afterlife WITHOUT ANY PROOF? A Golden Evolution is suggested. Are you one of those who largely wasted your life looking out only for yourself, family and friends? Could there be a higher calling? You, too, can make a positive difference. Rainbow Vision is explained to equip you with the tools to help save Planet Earth and Humanity.

Do your students know which content is most important to learn? Academic standards call for increased rigor, but simply raising complexity is not enough. Students must also take responsibility for their own learning. They need to be able to determine which content is critical, why it is important, how it connects to their existing knowledge, and when it will inform their future learning. Based on the earlier work of Dr. Robert J. Marzano, *Identifying Critical Content: Classroom Strategies to Help Students Know What is Important* explores explicit techniques for mastering a crucial strategy of instructional practice: teaching students the skill of identifying critical content. It includes:

- Explicit steps for implementation
- Recommendations for monitoring if students are able to identify critical content
- Adaptations for students who struggle, have special needs, or excel in learning
- Examples and non-examples from classroom practice
- Common mistakes and ways to avoid them

The *Essentials for Achieving Rigor* series of instructional guides helps educators become highly skilled at implementing, monitoring, and adapting instruction. Put it to practical use immediately, adopting day-to-day examples as models for application in your own classroom.

His given name was But for the Love of Jesus Christ We Would All Be Damned Smith, III; BC for short. The name was peculiar to BC's societal caste. Some thought of it as a profession but you had to be born a Cleanser. This fact was inconsequential to the rest of

the passengers aboard the Earth-bound shuttle. "Cleansers" had precedence over everyone but a higher-level Cleanser in all aspects of society. This status was fine for the sociopathic, but for one with emotions the singularity was often too much. The church controls the interstellar harvest of resources. BC is their enforcer. What happens if the assassin gains a conscience? For a "Cleanser" with emotions, singularity is too much "The Cathedral" combines high-concept speculation with fast action and cliffhanger thrills. The Church becomes the predominant government body, and develops its own enforcement arm. Once their best "Cleanser" goes rogue, all Hell breaks loose
